Important Information for Correspondents and Customers

WE RESPECTFULLY CALL ATTENTION TO THE SUGGESTIONS ON THESE PAGES, WHICH, IF FOLLOWED, WILL AID IN THE PROMPT AND SATISFACTORY EXECUTION OF YOUR ORDERS

McGregor's Year Book

The distribution of this Catalogue, with the opening of another season, presents another of the greatest sales in the history of our business, and offers wonderful bargains in Roses and Plants of all kinds, Vegetables and Flower Seed, Fruits, etc. Our goods are grown in large quantities for wholesale purposes; our retail prices, therefore, are based on large productions giving our retail customers an easily appreciated advantage, and further by adopting a plan of special offers and collections and making our sales to you by mail, our expenses are reduced to a minimum, with the result that we offer you the lowest possible prices for all goods of our large and varied line.

Springfield, Ohio, U. S. A., is centrally located geographically and with unequal facilities for shipping orders by mail or express. Here is headquarters for growing and shipping of all kinds of Plants and especially of Roses where they are produced in greater quantities than any other place in the world.

Comparative Value of Roses Don't think any Rose too small to do well. The roots of one-year plants being carefully protected in pots, permits of the shipping and successful planting anywhere. Roses of this size are to be recommended for all Rose-growing sections. If you wish the largest and best Roses for quick effect, then Roses of the two-year size from four to five-inch pots are to be recommended.

Advantage of Pot Grown Roses There is another advantage in planting pot-grown Roses; namely, that they can be planted at any time of the year. The ball of earth contains all of the fine fibrous roots, and when the plants are shipped transplanting can be done with no more injury to the plant than if the Rose had simply been removed to a larger sized pot. The growth continues just the same and the roots do not have to establish themselves, as is the case with the dormant plants. The pot-grown Rose, therefore, has many advantages over other Roses.

Instruction Leaflets On different pages in our catalogue we offer leaflets giving full Cultural Directions on practically all of the different classes of Plants that we sell. Offering leaflets in this way are not compelled to ask from those who purchase a limited number of articles a large price for a complete book of instructions. The leaflets are carefully prepared and will be found to contain important and valuable information on the growing of subjects they cover. Price, 2c each.

If You Wish Orders Held Be sure to say so, then we can book your order until any later date desired; otherwise we assume order is wanted at once, and for shipment without further instructions.

Postage Stamps These can be sent for fractional parts of \$1.00, or when postoffice orders cannot be had, provided two cents in stamps extra are sent with every remittance. Send perfect stamps only.

Our Prices will compare favorably, we believe, with those of any responsible firm in the United States, and are so low we must ask cash with order.

Remittance With Order Please send sufficient money to cover your entire order. The safest way is by means of postoffice order. If these are lost a duplicate can easily be obtained, and there is no danger of their being stolen, for no one can obtain money on them except the person to whom they are addressed. They can be obtained at all postoffices. The fee is but five cents for \$5.00 and under.

FREE OFFER If you send us an order amounting to \$1.00 from a friend or neighbor who is not now a customer of ours, we will send you any one of the beautiful Roses shown in color on the face of cover of this book, free. If order from new customer amounts to \$2.50, we will send you any three of the Roses. If order amounts to \$5.00 we will send you the six Roses.

Surprise Offer—After-Season Sales

Propagating as we do six months in advance of the selling season, we must not be satisfied until we have taxed the limit of our capacity and made allowance for natural increase of business. As a result we generally have surplus of all kinds of plants and rather than carry this stock over, we hold a Clearance Sale beginning June 1, and make up Surprise Collections of miscellaneous plants at 98c per collection, six collections for \$4.88. In these 98c collections we give several dollars worth of plants. The plants in these collections must be strictly our selection. Orders accepted any time during the spring for delivery June 1st.

Parcels Post Heretofore the limit of weight of a package of mailable plants, bulbs and seeds has been four pounds. The newly established system of Parcels Post simply gives the added privilege of transferring through the mails packages of mailable plants, bulbs, seeds, etc., of increased weights. Do not construe this to mean, however, that the increased size of package allows carrying express size plants. It only permits of sending you larger orders of mailable plants.

Shipment of Plants Mailable plants, bulbs, and seeds are sent by parcels post mail. See rates, page 2. Express size plants travel at special rates from Springfield at from 25 to 33½ per cent less than regular rates. Purchaser pays expressage.

Our Nursery Department is separate and distinct from our greenhouse, and it is necessary, therefore, that all items from this department (page 96) be shipped direct from our nursery under separate transportation charges.

Premiums Our terms being cash with the order enables us to give additional plants, bulbs, and seeds on orders amounting to \$1.00 or more, as follows: On \$1.00 worth of goods bought at single Plant, Bulb or Packet prices, select plants, bulbs or seeds to the value of 20 cents extra. On a \$2.00 order select 40 cents extra. On a \$3.00 order select 60 cents extra. On a \$5.00 order select to the value of \$1.00 extra. On \$6.00 select \$1.20 extra, etc. Larger orders, premiums in proportion.

Responsibility —We must advise that all shipments, mail and express, are made at purchaser's risk f. o. b. Springfield, Ohio. Every care will be given, however, to packing and delivery.

Why We Can Save You Money

Our goods are grown in large quantities for wholesale purposes. Our retail prices are based on our large production, giving our retail customers an easily appreciated advantage.

Table for Postage, Boxing and Packing Charges for All Mail and Parcel Post Shipments

A TRIO

That has earned its title. In size, color, form and fragrance, they are unexcelled. All hardy, vigorous growers. A most wonderful combination. A very imposing and important trio of roses.

These Wonderful Roses

Offered here constitute a very imposing and important Trio of Roses. In shapeliness and color, fragrance and form the three varieties have no rivals among Roses. They are varieties for the amateur and professional. They thrive anywhere and bloom under more varying conditions than many other varieties. There are other Roses that are a real delight, and others that one should grow, but there are none that excel in all points the National Trio, red, white and pink American Beauty.

The National Rose of America

The American Beauty

The Prize RED Rose.

Greatest of Them All.

(Hardy summer blooming, should be protected.) A hardy Rose of the larger size, having the everblooming qualities of the Tea Rose with the delicious odor of the Damask or Moss Rose, and equally valuable for winter or summer flowering. The flowers are so eagerly sought that they sell in the larger cities during the holiday season at the extravagant price of from \$1.50 to \$2.00 for a single bud or flower. In color it is a deep, brilliant, rosy-carmine, shaded toward the center with rich carmine-crimson. The back of the outer petal takes the color of lighter dull carmine. The American Beauty is one of the most vigorous Roses we have. It makes the heaviest stems and the largest bush, it not being unusual to see a rampant bush with a dozen canes as thick as one's finger and several feet in height. The American Beauty is unquestionably the most popular Rose now before the public, a popularity due principally to its value as a winter forcing variety. It should be protected outdoors in the winter. Sold under positive guarantee as to being true to name. Nice 1-year plants, 35c each; 3 for \$1.00; 12 for \$3.36. Two-year, 75c each; 3 for \$2.14; 12 for \$7.20; 3-year plants, \$1.25 each; 3 for \$3.56, by express.

The Popular Hardy Pink Climbing Rose. A Wonderful Rose of Wonderful Color

DOROTHY PERKINS

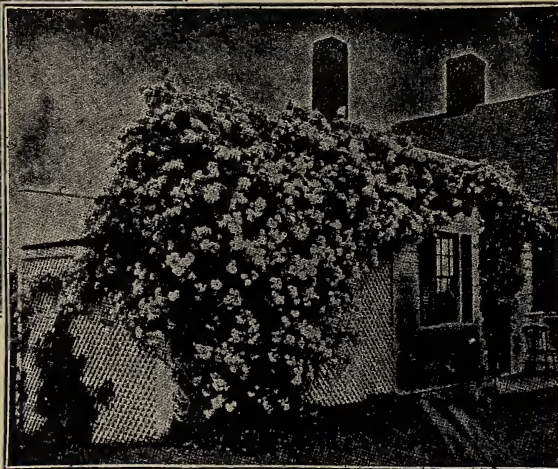

The Most Graceful, Free-Flowering and Vigorous Climbing Rose

Flowers produced in clusters—thousands of them on a single plant

(Hardy June Blooming). A beautiful shell-pink Rose, of sweetest fragrance, useful for many purposes, and giving wonderful satisfaction. Even when the flowers commence to fade the color is still pleasing, being then a lovely deep rose. The flowers are large size for this class of rose, usually about one and one-half inches across; are borne in clusters of from ten to thirty and are very double; the petals are very prettily rolled back and crinkled; the buds are remarkably pretty, being pointed in shape and of just the right size for the buttonhole. In vigor the Dorothy Perkins is all that can be desired, making in a single season strong lusty shoots, often ten to twelve feet in height. In habit of growth it is rather upright, having much the habit of the Crimson Rambler. It is therefore especially adapted as a companion rose to Crimson Rambler. The flowers are very sweetly scented, a characteristic not possessed by most other roses of this class. The foliage is of deep green, of thick, leathery texture and remains on the plant in perfect condition till well on into winter, making it almost an evergreen variety.

The Best All-Round Plant Grown

THE IDEAL FERN Roosevelt

A Notable and Valuable Novelty.
Wins Prizes Everywhere.

The grand Roosevelt Fern has had the most phenomenal sale of any decorative plant grown. Fronds broad and heavy, often measuring 6 inches or more across, and five or six feet long. The divided pinnae or miniature fronds which are so gracefully arranged, keep growing constantly, overlapping each other and showing two shades of green, while the center and main part of the frond is rich dark green, the contrast producing a beautiful effect.

Popular Porch and Basket Ferns

Japanese Lace Fern

One of the Most Beautiful and Popular
Foliage Plants of the Century.

A Decorative Plant of Unusual Value.

(*Asparagus Plumosus*)—The family of *Asparagus* plants prizes a number of varieties. Some are climbers, some drooping or trailing, some erect and bushy. Many of them are highly prized for their beautiful and graceful foliage, and the two varieties which we list on this page are practically the most popular and valuable of all. The variety *Plumosus* (*Asparagus Plumosus Nanus*) is a tall climbing decorative plant and one of the rarest and of delicate beauty. Its bright green foliage is extremely fine and plume-like. The fronds grow from six to eight inches in width and when cut retain their color and shape for weeks. The plant may be grown as a pot plant, a bushy form or climbing. *Asparagus* possess the advantage of being more graceful and its foliage finer than those of the most delicate Fern. As a house plant it will thrive under practically all conditions. The *Asparagus* likes a good rich soil and fairly warm temperature. The plant does best and carries the richest color of foliage when it is kept in a growing condition through a plentiful supply of nourishment. *Asparagus* is comparatively free from diseases, and with all its good qualities, and practically no bad ones, it ranks as one of the first decorative plants to be had. Nice young strong growing plants, 26c each; 3 for 74c; \$2.50 per dozen. Stronger plants, 38c each; 3 for \$1.08; \$3.65 per dozen. Larger plants, 60c; 3 for \$1.70; \$5.66 per dozen.

Foliage Graceful and Drooping Dense
Glossy Green.

(*Asparagus Sprengerii*)
The *Asparagus Sprengerii* gives us a plant of the bushy and drooping form of the *Asparagus* family. The foliage is composed of dense glossy green; graceful, drooping branches. The Feather Fern or *Asparagus Sprengerii* is probably of a hardier nature than the *Plumosus*, and subjects itself to wider usage. It is especially valuable for window box and hanging basket planting, for vases and as specimens when grown in pots or as tub plants. The Feather Fern or *Asparagus Sprengerii* gives us a more valuable house plant, being one of easy culture, the sprays growing four to five feet long, and when the foliage is used for cut-flower work it retains its freshness for an unusual length of time. The Feather Fern is particularly free from troublesome insects or diseases. The plants are of rapid growth, succeeding well in ordinary rich soil, and there is every reason to believe that all plant growers can have the greatest success with them. Nice strong growing young plants, 24c each; 3 for 68c; \$2.30 per dozen. Strong plants, 36c each; 3 for \$1.03; \$3.46 per dozen. Larger plants, 58c each; 3 for \$1.66; \$5.55 per doz.

Dwarf Fruiting Orange

"Fruits freely—easy to grow—beautiful blossoms—delightfully fragrant."

Dwarf free-flowering variety, which is suitable for pot culture, and which with any one proves one of the most desirable pot plants it is possible to possess. While it will grow three or four feet high and branch freely, it is not an uncommon thing to see little cutting plants five or six inches high full of bloom, and even bearing one or two medium-sized oranges. The fruit at its best is not more than one-half the size of an ordinary orange, but is very bright and beautiful in color, delicious in quality; but it is for its flowers more than its fruit which commends it to general cultivation. When it blooms it is so full that it seems to be all flowers. The pure waxy-white blossoms emit a delicate yet powerful fragrance which is surpassed by no other flower. Price, nice plants, 26c each; 3 for 65c; 12 for \$2.05; large plants, 38c each; 3 for 95c; 12 for \$2.90. Large plants by express only, 50c each; 3 for \$1.25; 12 for \$3.60.

The growth can be pruned to any size or shape. A Beautiful Porch or Pillar Rose. Color, Soft, Glow-
ing Red; Flowers of Immense Size.

The Wonderful Hardy Climbing Rose Red Climbing AMERICAN BEAUTY

Climbing American Beauty, the new porch Rose, gives us a new Rose of wonderful beauty and merit. It is a cross between the world famous cut-flower Rose, American Beauty, and an unnamed seedling. It is an American production, the product of American Rose growers. The object in producing this new Rose, the introducers say, was to produce a Rose of strong constitution, freedom of growth and bloom, hardiness, and foliage resistant to mildew and other diseases. In the Climbing American Beauty are combined all the qualifications sought. It is perfectly hardy, strong growing, making canes from ten to fifteen feet in a season, a perfect mass of bloom in June and produces flowers occasionally all through the growing season. The foliage is large, bright, glossy green, and never shows signs of any of the diseases that affect Roses. The color is a soft, glowing red, identical with its pollen parent, the American Beauty, and with the same exquisite fragrance; a quality not found in all climbing Roses. The flowers are of a size three to four inches in diameter, finely formed on long stems, and are produced in great profusion. This new Rose will bloom in almost any situation where a climbing or pillar or porch Rose is desired. It is one of the early Roses to bloom in the spring, coming into flower the latter part of May and the early part of June and continuing in full flower for a long time. Success beyond expectations has been found in producing a climbing Rose of the same color, size of flower and fragrance of its pollen parent, the American Beauty, with the addition of better foliage and blooming qualities; one plant producing twenty times as many flowers in June as the American Beauty bush rose. Nice plants, 30c each; 3 for 85c; 12 for \$2.93. Two-year plants, 65c each; 3 for \$1.85; \$6.24 per dozen. Extra large, 3-year field-grown plants, \$1.00, \$1.50 and \$2.00 each.

Popular and Showy DECORATIVE PLANTS

Ficus Elastica—Rubber Plant, \$1.00.

Rubber Plant

(*Ficus Elastica*)—*Ficus Elastica*, better known all over the country as the Rubber Plant, is undoubtedly one of the most satisfactory house plants. The plant is of tropical nature, being at its best under moist conditions and high temperature, but if well cared for, the foliage kept clean, good drainage provided, and the soil kept sufficiently moist, it will continue growing throughout the year. Its wonderfully thick leathery leaves enable it to stand excessive heat and dryness, while its deep, glossy green foliage always presents a showy appearance. It is particularly adapted to house culture and for porch decoration. Strong plants, \$1.00 each. Larger plants, \$1.50 each. Large specimen plants, \$2.00 each, by express only.

Beautiful Moss Fern

A new, upright-growing moss, with numerous feathery stems branching from the base and forming a dense tuft very much like the ferns used in ferneries. 24c each; 3 for 68c; \$2.30 per dozen.

Screw Pine
Pandanus Utilis.

Broad Leaved Croton, 75c.

Crotons

We offer broad and narrow leaved varieties. Nice plants, 75c each; 3 for \$2.00; large plants, \$1.00 and \$1.50 each, by express only.

Fan Leaf Palm

(*Latania Borbonica*)—This is the typical Palm and is more largely grown than all other varieties combined (possibly excepting the Kentias). Its vigorous, healthy habit and large, glossy green, fan-like leaves commend it to all. Nothing is more satisfactory as a decorative plant than a well-grown specimen of *Latania*. This is the Palm from which the Chinese Palm Fans are made. Adapted to all decorative purposes within or without doors. Nice young plants, 35c each; larger plants, 75c each. Strong plants, \$1.25 each; large specimen plants, \$2.00, by express.

Hybrid Perpetual, or HARDY JUNE ROSES

There is little question that June Roses are the most valuable of all hardy plants. They are of vigorous upright growth, have large bold flowers, frequently measuring five to six inches in diameter, and are deliciously fragrant. These Roses will succeed in any locality and are so hardy that they will live through the severest winters with but a light protection of leaves or coarse manure. In shapeliness, color, fragrance, form, grace and beauty the Hybrid Perpetual Roses have no rivals among Roses.

Watermelon Begonia

Peperomia Variegata—A most beautiful ornamental plant from the Sandwich Islands. 24c

Excellent for house, window or table. The leaves are distinctly variegated white and green, thick and waxy-like and have the appearance of being powdered with frosted silver. The fleshy leaves enable them to withstand the dry air of living rooms much better than the great majority of plants. While primarily greenhouse plants, they do well under irregular temperature without damage. The Watermelon Begonia requires shade in the summer, but should be given full sun in the winter and less water than the majority of plants. They should not be kept overwatered. A loose soil provided with good drainage places them at their best. Price, 24c; 3 for 60c; 12 for \$1.90; larger plants, 48c; 3 for \$1.20; 12 for \$3.40.

The Everblooming Butterfly Bush

The Sensational Deciduous Shrub, *Buddleia Variabilis Magnifica*.

It attracted unusual attention and was greatly admired by thousands. The *Buddleia* is a deciduous bush, dying down in the winter. In the spring the top should be cut off quite close to the ground. The blooms come from the new wood produced through the summer. It is very rapid growing. It produces long, graceful stems which terminate in tapering panicles of beautiful lilac-colored flowers that are of miniature size and borne by the hundreds on a flower head which is frequently ten inches long. Single and Double Sweet Scented Violets

The Violet gives us the most popular and important flower in culture, for it ranks third in commercial importance; the Rose first, Carnation second and Violet third. This comparison is reckoned commercially by the length of the blooming season, which is raised as ten, eight and seven months. A crop worth millions of dollars is raised annually from the Violet through private and commercial work, and Violet culture is now receiving unusual attention. It is a beautiful flower, popular with all, and of easy culture, doing well in any good rich soil.

Marie Louise

Bold, fine flowers, very fragrant and very prolific. The color is of a dark blue; flowers double. This is the favorite double or blue Violet that you see in the florists' windows. 22c each; 3 for 50c; 12 for \$1.75.

Beautiful Foliage Plant Fittonia

This pretty plant, with its small flowers, is well adapted for ferneries and fancy plant dishes. It does best wherever the atmosphere can be kept fairly moist as it heightens the colorings of the beautifully veined, variegated and strongly marked leaves and makes a very striking plant when grown with other plants. The cut gives a faint idea of its beauty. It would be hard to overstate the merit of the Fittonia for there is no other plant like it with such distinctly colored heart shaped leaves, so brilliantly veined and variegated, and of such easy growth. 24c each; 3 for 68c; \$2.30 per dozen.

Royal Purple Plant

Strobilanthes Dyeranus—This plant will undoubtedly become universally popular on account of its brilliant and exquisite coloring, its extraordinary easy growth and usefulness as a decorative plant.
